DETAILED ACTION

This Office Action is in response to the Election filed on November 13, 2001.

Election/Restrictions

Applicant's election of Group II, claims 9-15 in Paper No. 4 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 4.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 9-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Carroll (US 4,857,893).

Claims 9-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Eckstein et al. (US 5,861,809).

Claims 9-12, 14, and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Jacobson et al. (US 6,294,401 B1).

Jacobson et al shows (fig. 4) a microelectronic fabrication comprising a substrate (410), a spirally patterned conductor layer (426) formed over the substrate wherein the spiral patten terminates in a microelectronic structure (425) formed within the center of the spirally patterned conductor layer. The spirally patterned conductor layer forms a planar spiral inductor and the microelectronic structure comprises a series of electrically interconnected sub-patterns. The substrate is employed within a microelectronic fabrication of integrated circuit microelectronic fabrications. The microelectronic structure is selected from the group consisting of bond pads. The microelectronic structure is actually a capacitor connected with a bond pad. (col. 7, lines 3-30). The spiral pattern is in the shape of a rectangle and comprises more than one loop.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Burghartz et al. (US 6,114,937) and Staudinger et al. (US 5,416,356) also show spirally shaped planer inductor structures.
